BRAND VISION

By combining quality, comfort and beauty we redefining the luxury on the water to create memories which transforms to unforgettable experiences. Our yachts with sophisticated design create social areas where you and your family and friends can feel the sea at luxury level and spend quality time on board. We craft our yachts by merging modern and sporty lines with functionality to create winners in the market. Precise engineering, construction and seaworthiness are the foundations of our shipyard.

POWERFUL AND DETAILED DESIGN

SANCREA

UNFORGETTABLE EXPERIENCE.

Sancrea 33 is a beautifully designed day boat which provides luxurious, relaxing space throughout the intelligent cockpit layout. Its performance hull is seaworthy, safe and easy to drive. The most notable feature is the versatility of the cockpit. With the sleek and stylish hardtop, stunning opening side balconies and plus hidden outboard engines with the sunpads on the top is a boat that's just ready for anything.

WHERE OUR STORY BEGINS

ALUMINIUM CONSTRUCTION The aluminium construction provides a high degree of stiffness which makes our alu boats rigid with exceptional properties of strength and resistance. Our masters in the shipyard building aluminium boats by hand with precise engineering. In addition to that aluminium boats are very sustainable both for greener future and are remarkably resistant to corrosion, osmosis and structural fatigue.

YACHTS

SUSTAINABILITY We build our boats in future-compatible and eco-conscious way. We are using environmentally friendly and fully recyclable material like aluminium for new upcoming projects. For eco cruising we are installing solar panels with smart energy management and new technologies.

WOODWORK Traditional wood work that done in the boat building process by our masters is the result of knowledge and experience that come from one generation to another generation starting from the first years of building Ottoman Empire's fleet.

GRP CONSTRUCTION We use vinyl ester resin in the construction of our composite yachts which offers the highest resistance to corrosion and heat, as well as to water penetration. It also has the best elongation properties among the marine resins.
